LED BOLLARDS

Efficient and cost-effective LED Bollards providing rotationally symmetrical illumination for ground surfaces. The photometric design of these luminaires is based on LEDs integrated with K-LITE's precision reflector module.

Consistent implementation of advanced technological developments, combined with superior technical and structural quality, has resulted in these state-of-the-art luminaires.

They are characterized by high luminous efficiency, exceptionally long service life, and uniform illumination.

These bollards are available in Ø100mm, Ø166mm & Ø200mm diameters, with three different height options to suit various installation requirements. Their robust construction makes them ideal for areas where high durability and vandal resistance are essential.

Applications: Suitable for the illumination of footpaths, entrance areas, driveways, and private or public landscapes.

K-LITE Advantages – Powerful Design, Powerful Light

- Extruded aluminium alloy housing produced through homogenization for superior durability and efficient thermal management.
- Stainless steel hardware for long service life and ease of maintenance.
- Silicon EPDM gaskets ensuring IP-rated protection, safety, and product reliability.
- UV-stabilized, non-yellowing polycarbonate diffusers for better light transmission, vandal resistance, and UV stability.
- 60-micron thick polyester-based powder coating for uniform finish, durability, and corrosion resistance.
- CREE / OSRAM / NICHIA LEDs – internationally reputed brands known for high lumen output, excellent illumination quality, and long operational life.
